Work Experience

Credit Suisse

Application Architect and Developer

FROM MAY 2021 | DUBLIN, IRELAND

Contributed towards integrating multiple tools and systems like Jira, Confluence, Jenkins Pipelines, Bitbucket, Sonar and NexusIQ into the in-house developer platform solution called Odyssey, that was used by thousands of developers across the organisation.

As a Full-stack Java developer, mainly worked on creating custom APIs for the Odyssey platform, developed dashboards and UI components using Angular.

Contributed as a backend and UI developer while improving Heimdall – a custom solution used for automating the Change Requests.

Skills: Angular · Integration · OpenShift · Spring Boot · Java · REST APIs · Docker · Jenkins · API Development · Continuous Integration and Continuous Delivery (CI/CD) · DevOps

AIB

Java Software Developer

APR 2019 – APR 2021 | DUBLIN, IRELAND

As a Java Developer, I contributed towards implementing the OpenAPI RESTful endpoints for the bank's third parties.

My role as a Java developer included developing, testing and delivering scalable, cloud-ready microservices and RESTful APIs for AIB. For the development and delivery of microservices, we used Spring Boot and Spring Cloud along with other technologies from the Netflix OSS like Eureka, Ribbon, Hystrix and Zuul. We followed TDD/BDD with Cucumber and Mockito frameworks and deliveries follow CI/CD with Docker and Jenkins.

Skills: Spring Boot · Spring Framework · Java · Spring Cloud · Netflix OSS · Zuul API Gateway · Behavior-Driven Development (BDD) · Eureka · Apigee API Management · Swagger API

Fidelity
Investments
